Clay's lifetime of experience with many breeds includes over two decades of work with Friesian horses. His well-honed skills include not only starting, training and exhibiting some of the country's best-known driven horses, but also developing performance Friesians, of The Friesian Spectacular, who in his hands, effortlessly demonstrate some seemingly impossible lateral maneuvers while driven.

Clay's clinics open new perspective from the ground that will also bring a new understanding in the saddle and/or carriage. Together, you and your horse can benefit from insights that long reining brings to whatever discipline — from dressage, to trail riding, to driving. These clinics offer a superb opportunity to learn techniques directly from a master of long reining and driving horses.

Clay's clinic goals are to help you develop skills to make you and your horse more confident, safe and successful, beginner or advanced.

Clay Maier recently moved his operation to the Kentucky Horse Park as an in-house trainer, consultant, and performer.
